

Garageband Help Guide

Starting a New Project

- Open Garageband and select “Empty Project”
 - Or from the file tab at the top select “New...”

To change the instrument of a track

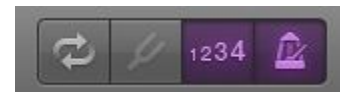

- Highlight the track and (it will turn light grey in color) and select a new instrument from the menu on the left.

Adding another track

- Click the plus button (“+”) above your instrument tracks
- Then select software instrument
- It will automatically add the instrument “Classic Electric Piano”
- Highlight the track and select a new instrument from the left hand instrument menu

Double click to change tempo/speed. The smaller the number the slower the speed

Make sure both of these are highlighted in pink

Stop
Play
Record

Rewind back to beginning

Loop Library (this is where you will find drum beats to add)

Saving your project

- File → Save
- Save As : Your name_class period
- Save to the Documents
- If you don't save it... you lose it... too bad so sad.... :(
